APPENDIX 2.

Table of Submission to Draft Waste Management and Minimisation Plan 2025 - 2031

Thank you to all 79 submitters and those who wish to speak at the hearing on 27 August 2025

Council asked the community for feedback on the following consultation topics:

- 1. Your Household
 - a. How many people in your household?
 - b. The Draft Waste Management and Minimisation Plan is looking at ways to reduce waste being created and sent to landfill, with actions aimed at increasing the amount of waste we can divert through recycling or reusing. Overall, the goal is to keep resources in circulation and minimise harm and impact to our environment and community from waste. What do you think of this direction?
 - c. What is most important to you and your household?
- 2. Recycling
 - a. Select what items can be recycled at your kerbside.
 - NB: Kerbside collections = Plastic 1, 2, 5; Glass bottles and jars; Cardboard, Tins and Aluminium

- c. Do you already separate out your glass for kerbside recycling collection?
- d. What would help your household to recycle more products?
- e. Tick all that apply. When you are purchasing products do you consider...
- f. Should Council investigate putting in a range of Recycling Bins for public use in high-use areas?
- 3. Kawerau Transfer Station Plans
 - a. If there was no cost to drop recycling to the Kawerau Transfer Station would you sort and drop off your recyclables at the Transfer Station more regularly?
 - b. Tick all that apply. Did you know that you can drop off the following items to the Transfer Station?
- 4. Greenwaste and Foodwaste
 - a. Do you already compost food waste at home?
 - b. Do you already compost greenwaste from the garden at home?
- 5. Education and Communication
 - a. How do you want to receive information from Council?
 - b. What else could Council do to encourage recycling, and waste minimisation?
 - c. Do you support the Paper 4 Trees and Zero Waste Education Programs being provided to our Kawerau schools and preschools as part of the waste minimisation plan education?
 - d. Council plans to invest in waste minimisation education at our Kawerau Schools do you support this?
- 6. Any other feedback

(Please note, all submitters are residents)

#	NAME	HEARING	SUBMITTERS' RESPONSE TO SUBMISSION TOPICS
01	Patrick Condon	YES	Q1.a. Two
			Q1.b. Strongly Agree
			Q1.c. Future proofing the environment for many generations to come, Cost - buying affordable products and Costs to the community – reducing disposal costs by recycling and reusing goods
			Q2.a.
			× Sauce bottles (number 4 plastic)
			× Lids
			× Aerosol cans
			Q2.b. No
			Q2.c. Yes
			Q2.d. Wheelie bins with lids to keep things dry. Have four
			different coloured bins pick each one week of the month. First week red, second yellow, third green, fourth blue.
			Q2.e. Price
			Q2.f. Yes – But they need to have cameras

Q3.a. Yes
Q3.b.
Whiteware items
• Tyres
Batteries
 Wood (treated and untreated)
Clean concrete
Clean fill and soil
Q4.a. Yes
Q4.b. Yes
Q5.a. Newsletter
Q5.b. We are about to start a new subdivision why not use
crushed glass and concrete as base course for roads
Q5.c. Submitter did not have a responds to this question
Q5.d. Yes
Q6. As a district, we should be encouraging people to set up recycling businesses in Kawerau.

			Q2.e. Price and If the packaging is recyclable
			Q2.f. A pretty good example is sitting in the Katikati recycling
			centre! There is a mobile recycling unit on a trailer (like a
			caravan) that gets situated in different areas over the year,
			mostly in summer think high use areas like waterways with
			heavy foot traffic. Christmas in the park, etc has branding all
			over the sides spreading the good word about recycling. Bonus
			it is on wheels so completely mobile so it can go on tour around their rohe.

			Q4.a. No
			Q4.b. No
			Q5.a. More than one way recieved – No.1 option is Website and
			No.2 Newsletter printed and delivered to homes
			Q5.b. It is in the Plan - to EDUCATE the Kawerau public and
			especially the next generations on all aspects on how VIP
			recycling and reusing is, and for this process to try to engender
			a sense of community again, for the common good, caring for
			nature and each other. The retail sector to be looked at
			regarding non-recyclable packaging and allow customers to
			dispose of that packaging back to the store for the store to
			recycle it. A soft plastic recycling system would be useful (such
			as Woolworths in Whakatāne). Encourage Kawerau residents to
			care enough to pick up litter but then again where are the public
			rubbish bins to put that litter in?
			Q5.c. Yes
			Q5.d. Yes
			Q6. Recycle, reuse - REPAIR. In future be nice for all ages to
			have ways to learn how to reuse, rebuild, and relearn our No 8
			wire and DIY skills (such as the Healthy Neighbourhood
			Scheme we had in Kawerau a few years back) - and leading to
			perhaps more local retail outlets selling reusable goods (as our
			current op shops do), Upcycling is now trendy for all the good
			reasons.

#	NAME	HEARING	SUBMITTERS' RESPONSE TO SUBMISSION TOPICS
46	Trish Brady	NO	Q1.a. Just myself
			Q1.b. Strongly Agree
			Q1.c. Future proofing the environment for many generations to
			come
			Q2.a.
			A (1)
			× Pipes (number 3 plastic)
			Q2.b. Yes
			Q2.c. Yes
			Q2.d. Less plastic packaging at the supermarket and other
			retailers and for other things. More encouragement to reuse,
			repurpose etc. Teach people the skills to do such things maybe in night classes or weekend craft workshops etc
			Q2.e. Price, If the packaging is recyclable, ingredients for food
			products, and what chemicals are used in other products such as
			washing powder glues paint etc Q2.f. Yes but not at the pools (especially if it's for public use as
			that could be considered unsanitary,lol) as that could be
			considered unsanitary
			Q3.a. Submitter did not have a responds to this question
			Q3.b.Wood (treated and untreated)
			Clean concrete for a fee
			Q4.a. No
			Q4.b. No
			Q5.a. All above would be good coverage for everyone in town
			Q5.b. Maybe lobby shops to accept customers reusing their food containers, also encouraging customers to do this as well,
			as it might be something they hadn't thought of
			Q5.c. Yes
			Q5.d. Yes
			Q6. It's good to see the council considering these issues, and I hope you see it through even though you might not get much
			support for it.
			Maybe in considering the costs of shipping our rubbish
			elsewhere, the council could look into alternatives for dealing with it locally. At the moment the alternatives have their own set of
			problems, such as incinerator plants' air emissions and pollutants
			are ultimately self-defeating, the land (and people) need clean air
			and clean rain to nurture the soil for growing food, and there's enough people in town with respiratory problems due pollen and
			sprays etc, We don't need to add to that mix, but as technology
			improves, those sorts of plants could move to hardly any
			discharges, and the cost for running the plant could possibly offset the cost of shipping it out. This would also mean we take
			responsibility for our own stuff and not dumping it on someone
			else's whenua, or maybe it could be one of those projects where
			the councils work co-operatively in dealing with the scary amount of landfill that happens annually, everywhere. It would be good to
			keep the door open to possible solutions to these issues and not
			let set up costs stop us from doing it. Carry on. In the question about the transfer station if there was no cost for
			sorting and dropping off recyclables more regularly I would if I
			had a car, but I don't so I rely on the kerbside collection to take
			my rubbish to the dump. Thank you for your time, I look forward to seeing some of these
			ideas bare fruit

An evening meeting should be made so we get to have our voices heard. SUBMITTERS' RESPONSE TO SUBMISSION TOPICS Q1.a. Just myself
			I have complained about this before just to be told "we have GPS on our vehicles" It is not unusual for him to spend the day, in hours at home. He seems to forget it is us the ratepayers paying his wages. Weekends, it is worse. He must enjoy flaunting his style to the neighbourhood. Everyone is talking about it. Another example, two trucks, five men took 25 minutes to plant one tree. You are putting rates up, going to make us pay for water, which is already covered in our rates. So, rates should come down. I would say about 80% of ratepayers are retired so you are targeting them. Not everyone has a bank full of money and lots are struggling, if it weren't for my family we definitely would not cope. We shouldn't have to ask family to help. But that's the position this Council is putting us in. Look at your Council "Mayor" and start cutting back. It's time for ratepayers to have a fair deal. An evening meeting should be made so we get to have our voices heard. SUBMITTERS' RESPONSE TO SUBMISSION TOPICS Q1.a. Just myself Q1.b. Neutral

			Q5.d. Yes Q6. Paper and combustibles Has any thought been given to the use of the great un-used resource at the old Norske Skog mill of the power boilers to burn paper and combustible refuse? It may require a local investment company set up and require an investigation team to sus it all out etc. but with the modern methods of 'scrubbing' gases for discharge it's worth consideration. Re Use of Plastics There is someone already (in NZ I think?) melting down the

			manufacture of marketable posts for the horticulture industry and perhaps, products for the building industry. I would imagine the biggest cost in that endeavour would be the energy required yet we prehaps have it to 'waste' Steel of course is presumably collected and sold to the metal dealer for NZ Steel. I don't see the Council doing all this as they have their own duties but perhaps, they could be the initiator or catalyst for the development of appropriate groups to investigate the feasibility of the ideas. groups could be formed 'outside' of Council from a mix of local volunteers and businesspeople who are lateral thinkers. I say volunteers so that those with ideas need to be there for the right reasons. We have two major underutilised resources in the district. The defunct power boilers and the geothermal steam. If we don't have the ideas and skills to capitalise on them then it is a waste in itself.

			Q5.c. No
			Q5.d. Submitter did not have a responds to this question
			Q6. Yes, in my knowledge I am very upset about the rates going
			up heaps and then I see many folk who work for the council just
			hang around in groups just to plant flowers and also have way
			more tume at their home when they think its their right and oops
			up goes my rates again to pay for them again plus look on google
			how many are now working on council way top heavy it's just an
			influx of groups standing round and morning tea, how can it
			always be 1 hour or more pleas lunch cut your workers in half call
			for a public meeting and listen to the ratepayers for a change -
			time for a change.
